### NITRILE MEDICAL GLOVES

#### Description

These Nitrile Medical Disposable Gloves are powder free and made from 100% nitrile and are a great option for people who have latex and donning powder allergies. They are very durable and resistant to being pierced by sharp objects. The fingertips are textured for enhanced grip in a multitude of situations, including picking up sharp objects and small needles.

#### Applications

These Nitrile Medical Disposable Gloves are used to provide hand protection from dust, liquids, blood-borne pathogens and certain biological substances in hospital, medical center and laboratory settings, when frequent glove changing is required.
