SOLUTIONS

# DRY SHAKER

## SURFACE DECONTAMINATION

### What is the Dry Shaker?

The Dry Shaker is a portable dispensing bottle filled with Spill-CAT that can be used to quickly deal with spills or decontaminate surfaces and vehicles.

### How does it work?

**Surface Decontamination** – Simply shake the bottle to dispense Spill-CAT powder where required and leave. The Spill-CAT powder will absorb any free CWA and neutralise it in place.

**Coverage** – Spill-CAT is able to neutralise 1 kg of CWA with 2kg of Spill-CAT powder. The Dry Shaker is available in a variety of sizes to ensure the user has adequate supply.

### Why use the Dry Shaker?

- **Effective** – Spill-CAT is able to degrade a wide range of CWAs at levels >99 %.
- **Ease of use** – Simply open the bottle and apply Spill-CAT where necessary.
- **Portability** – The Dry Shaker is available in a range of sizes and can be easily stowed in a quick response kit, Bergen or vehicle cabin.

## Technical Data

### Dimensions<sup>†</sup>

Spill-CAT Capacity	250g – 1kg
Length	80 – 140mm
Width	80 – 140mm
Height	190 – 270mm
Weight	250g – 1kg
Storage	2 years

### Spill-CAT Formulations

MMx	HD, L, YA
GMx	GA, GB
VMx	VX

### Shaker Details

Container	Polypropylene
-----------	---------------

<sup>†</sup>Custom sizes for all systems available on request.
